

Spring Professional Exam Tutorial v5.0

Question 33

Question 33 - What can you reference using SpEL?

You can reference following using SpEL:

- ▶ Static Fields from class - `T(com.example.Person).DEFAULT_NAME`
- ▶ Static Methods from class - `T(com.example.Person).getDefaultValue()`
- ▶ Spring Bean Property - `@person.name`
- ▶ Spring Bean Method - `@person.getName()`
- ▶ SpEL Variables - `#personName`
- ▶ Object property on reference assigned to SpEL variables - `#person.name`
- ▶ Object method on reference assigned to SpEL variables - `#person.getName()`
- ▶ Spring Application Environment Properties - `environment['app.file.property']`
- ▶ System Properties - `systemProperties['app.vm.property']`
- ▶ System Environment Properties - `systemEnvironment['JAVA_HOME']`
