

Spring Professional Exam Tutorial v5.0

Question 40

Question 40 - What dependencies does spring-boot-starter-test brings to the classpath?

spring-boot-starter-test brings following dependencies:

- ▶ JUnit - Unit Testing for Java Applications
- ▶ Spring Test - Spring Framework Support for Testing
- ▶ Spring Boot Test - Utilities and Integration Test Support for Spring Boot
- ▶ AssertJ - Fluent Assertion Library
- ▶ Hamcrest - Matchers Library
- ▶ Mockito - Mocking Framework
- ▶ JSONassert - JSON Assertion Library
- ▶ JsonPath - XPath for JSON
- ▶ XMLUnit - Tools for XML verification

You can see list of all dependencies with versions for maven module by running following command:

```
mvn dependency:tree
```
