

Spring Professional Exam Tutorial v5.0

Question 13

Question 13 - What are the HTTP status return codes for a successful GET, POST, PUT or DELETE operation?

- ▶ GET
 - ▶ 200 (OK) - when asked about existing resource for which content is returned
- ▶ POST
 - ▶ 201 (Created) - when new resources was created
 - ▶ 200 (OK) - when some processing was executed but resources were not created
 - ▶ 204 (No Content) - when some processing was executed, but no response is retrieved
- ▶ PUT
 - ▶ 201 (Created) - when new resources was created
 - ▶ 200 (OK) - when resources was updated, and updated content is returned
 - ▶ 204 (No Content) - when resource was updated, and no content is returned
- ▶ DELETE
 - ▶ 204 (No Content) - when resource was successfully deleted

In case of asynchronous operations, 202 (Accepted) may be returned with Location header indicating URI that can be used for polling.
